FEBRUARY 2010

KEEPING YOU UP TO DATE AND INFORMED

- 1. STORAGE SYSTEM FITTING KITS**
- 2. GULL WING DOOR MODIFICATION**
- 3. HILUX Vigo SPARE WHEEL LOCK**
- 4. SIDE MOUNT GAS BOTTLE HOLDER**
- 5. WINCH PLATES**
- 6. NEW PRADO 1.8M RACK AND DRAW SYSTEM ADVICE**
- 7. NEW PRADO TOW BAR**

1. As our storage systems are universal and most systems fit a large variety of vehicles, we have decided to offer 3 types of fitting kits to make fitment of the systems far easier. The following 3 kits are available off the shelf and can be used for the following vehicles.

- **FRDRKIT01** is a low mount fitting kit that makes use of 2 x roof rack tracks and stud plates to fit the storage system to the vehicle. This system is used on most station wagons where you do not need to lift them to high to slide out the back. The vehicles for this type of fitment include all the Cruisers and Prado's (not the new Prado) All Nissan Patrol Station Wagon's, Discovery 1 and 2's, and almost all other Station Wagons on the market.
- **FRDRKIT02** is a high mount fitting kit that makes use of 2 x H-Bar aluminum slats that stand 42mm high. These slats will come supplied with special stud plates and nuts for fitment. The design of this fitting kit is to raise the draw system above the lip of the rear door seal so that the storage system can slide out without catching on anything. This fitting kit is designed to be used in vehicles like the Toyota Fortuner, Pajero C.K L.W.B and S.W.B, Nissan Pathfinder and other vehicles with high plastic trims.
- **FRDRKIT03** is a kit that makes use of 2 small pieces of roof rack track, Aluminum spacers and stud spates. This kit is for use on Bakkies where the front lift is lower than the back due to the ribs on the floor of the Bakkie. The Aluminum spaces can be cut to size to accommodate the rubberizing in the load bin.
- **FRDRKIT01** will Retail for **R 395.00**

Directors : R S Langer & E Brach

FEBRUARY 2010 NEWS LETTER

- **FRDRKIT02** will Retail for **R 395.00**
- **FRDRKIT03** will Retail for **R 195.00**

2. We have made a modification to the Defender Gull Wing doors in that they now come supplied with a full frame and sit almost flush with the body of the car. This makes them exceptionally easy to fit and gives them a far more refined look. **FRLR112** still comes with two gas struts and two recessed locks and retails for **R 2685.00**

3. We have had a spare wheel lock made for the double cabs to fit on vehicles that do not have auxiliary fuel tanks, this spare wheel lock does not make use of the conventional key lock but makes use of a security wheel nut and threaded bar, **RTSWLOCK01** will retail for **R485.00**
4. Adding to our range of gas bottle brackets, we have designed **FRUN09**, a side mounted 7 or 10Lb gas bottle bracket designed to fit on the inside of load bins, the side/back or front of trailers or on any vertical service. This bracket makes mounting a gas bottle almost anywhere you want exceptionally easy. It will retail for **R 298.00** and is available immediately.

5. Just a recap on the winch plates offered by Front Runner
- Discovery 4 winch plate **FRDISCO54** Retails for **R 2385.00**
 - Hilux/ Fortuner winch plate **FRHX52** Retails for **R 1950.00**
 - Nissan Patrol pick up winch plate brackets **FRPT61** Retails for **R 695.00**
 - Universal winch plate **FRUN39** Retails for **R 545.00**
6. We have made a track mount roof rack for the New 2009> Prado. The 1.8m Track Mount roof rack **FRPR4009** uses a **FRTRPR103** track 2 x **HRR9045** Feet 4 x

HRR9055 Feet and a **HRR4006** wind Deflector. It fits using existing holes in the roof with **NO** new holes needing to be drilled and Retails for **R 4850.00**

After considerable investigation and numerous phone calls and discussions regarding the rear seats of the new Prado, we have decide to advise against fitting a storage system into the rear of these vehicles. The rear seats operate electrically and the only mounts are on the rear of the seats themselves. It is believed that fitting a storage system to these mounting's could very well result in the motors and electronics being damaged. The only other alternative is to have Toyota remove the rear seats and reset the computer so that the alarm does not go off permanently. Then build up a considerable frame on which to mount a storage system. We will not be offering any such frame so this will need to be undertaken by anyone attempting to do this sort of fitment.

7. The tow bar mounts between the Middle (2003- 2009) model and New model (2009-) Prado's are so close that we have decide to offer one tow bar for both vehicles. The standard **FRPR51** has been marginally modified and now fits both models with ease.

The Retail price stays the same at **R 2350.00**.

Front Runner are in the process of designing a whole lot of new and interesting products that we will keep you informed about in the coming months.
